

Spectra™ MRSA

Selective Isolation and Detection of MRSA from nasal swabs or positive blood cultures.

To learn more about Remel Healthcare-Associated Infection solutions, visit www.remel.com/hai or contact your Technical Sales Representative.

See IFU for complete procedure. Variations in color will exist on the electronic version of the color guide. For use in the lab, please contact your local Technical Sales Representative to request a professionally printed version.

*Inoculate non-selective media in conjunction with Spectra™ MRSA.

**Rare strains of *Staphylococcus cohnii* and methicillin-resistant *Staphylococcus epidermidis* may grow and produce very dark navy-blue and pale-blue colonies respectively.
